

Instructions

1. Before you leave home, attach a separate ID tag with your name and contact information in case your luggage is lost.
2. Keep all valuables and important travel documents with you, not in checked bags.
3. Print one copy of this tag for every piece of luggage you plan to check upon arriving at the cruise terminal.
4. Print your name, ship name and cabin number on the lines provided.
5. Flip the page over, printed side down. Starting from one side, fold (don't cut) the page twice, longways, toward the middle, using the lines as guides.
6. Repeat the process on the other side, folding toward the middle.
7. Slide the tag, printed side down, through the handle on your suitcase.
8. Overlap the two ends, lining up both sets of yellow bars to make a circle, and staple or tape where indicated.
